At Jawaharlal Nehru Medical College (JNMC), under the aegis of KLE Academy of Higher Education and Research (KAHER), we take pride in implementing the **Competency-Based Medical Education (CBME) curriculum** since 2019. This initiative reflects our commitment to the vision and mission of the National Medical Council, aimed at producing medical graduates who are not only globally accepted but also locally competent to meet the healthcare needs of our communities. Our approach remains learner-centric, patient-centric, and outcome-oriented to prepare students for the evolving demands of modern healthcare.

A key feature of our CBME curriculum is early clinical exposure. From the beginning of their medical education, students are introduced to real-world clinical settings, such as outpatient department (OPD) visits, clinical postings, and field visits. This early integration of theoretical learning with practical application ensures our students gain meaningful, hands-on experience. Skill acquisition is at the heart of our curriculum, with training in skills labs and clinical settings, helping students develop essential competencies in patient care, communication, and medical procedures.

To monitor and enhance student performance, we have embedded continuous assessment methods into the curriculum. These include formative and summative assessments, along with objective structured clinical examinations (OSCEs), to evaluate both

theoretical knowledge and clinical skills. Regular feedback from faculty and peers ensures that students can continuously improve their competencies.

Our curriculum fosters a holistic understanding of medicine through the integration of subjects, encouraging students to connect different disciplines. The inclusion of the AETCOM (Attitude, Ethics, and Communication) module helps instill professional values, ethical conduct, and communication skills vital for medical practice. Furthermore, our Family Adoption Programme helps students engage directly with community healthcare teams, reinforcing their role in community-level health initiatives.

Technology plays a significant role in enhancing our teaching and assessment methods. We have adopted digital tools, simulation labs, and virtual reality to provide innovative and immersive learning experiences. Our faculty members are the backbone of this program, and we ensure their continuous professional development through regular training in modern teaching methodologies and assessment techniques.

We are committed to keeping our CBME curriculum dynamic and relevant. Regular reviews and refinements are conducted with inputs from students, faculty, healthcare professionals, and regulatory bodies. Dedicated curriculum review committees ensure we stay aligned with current medical education standards. Research and innovation are integral to our approach, enabling students and faculty to contribute to advancements in healthcare education.

Through these concerted efforts, we strive to develop competent, ethical, and skilled medical professionals who are ready to meet the challenges of contemporary healthcare. At JNMC, our commitment to excellence in medical education remains unwavering, and we take pride in shaping the future of healthcare with a vision that blends tradition, innovation, and community service.

#### 10. NEP Implementation and Digital Innovation

The University adheres to the guidelines set forth by the University Grants Commission (UGC) and fully implements the National Education Policy (NEP) as outlined by the Government of India. Over 5,000 students have been successfully registered with the Academic Bank of Credit (ABC), and all relevant data has been uploaded to the National Academic Depository (NAD) to ensure seamless academic records management. The University also actively participates in the All-India Survey on Higher Education (AISHE), contributing valuable data for national education assessments. Additionally, the University has facilitated the disbursement of scholarships through its dedicated Student Scholarship Portal, ensuring financial support for deserving students.

#### 11. Research Contributions and Healthcare Facilities

KAHER leads in translational and community-based research, particularly in maternal and newborn health, with high-impact publications and research partnerships. Attached hospitals with over 4,000 beds provide essential healthcare and practical training to students, serving populations across Karnataka, Maharashtra, and Goa with comprehensive super-specialty and diagnostic facilities.

KAHER actively participates in several Government of India initiatives, including skill development programs, Make in India, Study in India, National Academic Depository, Swachh Bharat Abhiyan, and the digital learning platform Swayam. Furthermore, KAHER is involved in various schemes by the Government of Karnataka, such as the Vaijpayee Arogashree Yojana, Leprosy Control Programs, District Blindness Control Program, Yashaswini Scheme, Manosadhara, National TB Control Program (NTCP), and health schemes for retired police personnel and defense staff, including the Ex-Servicemen Contributory Health Scheme (ECHS). The KLE Hospital, a key institution under KAHER, plays a pivotal role in providing high-quality, super-specialty medical care to thousands of patients below the poverty line, making healthcare accessible and affordable to the region's underserved populations.

KAHER remains at the forefront of research and innovation, with numerous active collaborations and memoranda of understanding (MOUs) with prestigious national and international universities, NGOs, and funding agencies. Our research initiatives are supported by major organizations such as the NIH, USAID, WHO, the Bill & Melinda Gates Foundation, and various Indian governmental bodies like DBT, DST, ICMR, and VGST (Vision Group on Science and Technology, Government of Karnataka). These collaborations have led to significant publications in high-impact journals, including The New England Journal of Medicine and The Lancet. KAHER also houses three dedicated research centers: the Mother and Child Research Centre, Dr. Prabhakar Kore Basic Science Research Centre, and the Central Clinical Trial Unit. Research from these centers has influenced national and international health policies, with guidelines developed from our studies being accepted by WHO and ICMR and implemented in over 58 countries.

As a health sciences university, KAHER boasts several hospitals affiliated with its colleges, providing both healthcare services to the community and practical, hands-on training for students. With over 2400 beds across its facilities, KAHER serves a population

of approximately 2.5 million across 12-15 districts in North Karnataka, Maharashtra, and Goa. The hospitals offer a comprehensive range of super-specialties, sub-specialties, diagnostic, and therapeutic services, including organ transplants, molecular diagnostics, PET scans, radiotherapy, and joint replacements.

KAHER is internationally recognized for its translational and community-based research, particularly in Maternal and Newborn Health. This research has not only contributed to numerous high-impact scientific publications in top journals like NEJM and The Lancet but has also been instrumental in saving the lives of mothers and newborns. Many faculty members are involved in clinical trials and drug development, further enhancing the university's impact on healthcare advancement.

Over the past 23 years, the Women's and Children's Health Research Unit (WCHRU) at JNMC has participated in 55 research studies, with a majority being multi-country and multicentre collaborations. Of these, 44 studies have been successfully completed, resulting in over 273 research publications. This work has been conducted in collaboration with 51 esteemed universities and research institutions across the USA, UK, Canada, Zambia, South Africa, Australia, and India. The WCHRU has secured funding support of Rs. 200 crores from 17 prominent sponsors, including the World Health Organization (WHO), National Institutes of Health (NIH), Bill & Melinda Gates Foundation (BMGF), Thrasher Research Fund, UK Medical Research Council, and the Department of Biotechnology, Government of India. The Major Recognitions and Collaborations and collaborations includes:

The TJU-JNMC Women's and Children's Health Research Unit has been selected as part of the Global Network for Women's and Children's Health Research, funded by the Eunice Kennedy Shriver National Institute of Child Health and Development (NICHD) for the period August 2023 to July 2030.

Designated as a WHO Collaborating Center for Research in Maternal and Perinatal Health since September 2019, with the current term running from October 2023 to September 2027.

Recognized as an ICMR Collaborating Centre of Excellence (ICMR-CCoE) for the period August 2023 to August 2028.

Acknowledged by the National Health and Medical Research Council (NHMRC), Government of Australia, as a Centre of Research Excellence for the period 2023 to 2028.

These recognitions and partnerships underscore WCHRU's commitment to advancing global maternal and child health research, further strengthening its role as a leader in the field of clinical research and collaboration.

**The Food Micronutrient Analysis Laboratory (FMNL)**, established in 2021, is a key initiative of the KLE Academy of Higher Education and Research (KAHER) and reflects our commitment to addressing critical public health challenges related to micronutrient deficiencies. Specializing in the precise analysis of micronutrients in food products, FMNL employs advanced techniques like Atomic Absorption Spectroscopy (AAS) and High-Performance Liquid Chromatography (HPLC) to measure iron and folic acid in wheat flour, and vitamin A and vitamin D in edible oils. The lab also supports the analysis of fortified millets through Near Infrared Spectroscopy (NIR).

FMNL plays a pivotal role in supporting both intramural and extramural research. The laboratory has forged collaborations with esteemed institutions such as PGIMER Chandigarh, AIIMS New Delhi, and Symbiosis Institute of Health Sciences. These partnerships focus on addressing micronutrient deficiencies and understanding their impact on health, particularly concerning iodine, iron, and zinc.

In addition to research, FMNL is dedicated to capacity building in the field of food testing. Over 85 trainees have benefitted from the lab's workshops, proficiency testing programs, and guidance materials, significantly enhancing the nation's capabilities in micronutrient analysis.

A significant milestone was reached with the recent inauguration of an experimental fortification lab by Dr. Prabhakar Kore, Chairman of the KLE Society, in the presence of Narendra Mohan, former Director of the National Sugar Institute, Kanpur, and other distinguished guests. This new facility marks a major step in advancing the lab's fortification capabilities.

FMNL has received substantial funding for its initiatives, including contracts for micronutrient testing training programs. The lab is equipped with cutting-edge instruments, including UV spectrophotometers, deep freezers, and muffle furnaces, ensuring the highest standards of precision in analysis.

Looking to the future, FMNL aims to expand its infrastructure and capabilities by acquiring additional staff, instruments, and establishing a dedicated food composition laboratory. These enhancements will enable the lab to further its mission of supporting public health through excellence in micronutrient research and fortification.

Our commitment to advancing nutrition research and improving community health remains steadfast, and the progress of FMNL is a testament to our ongoing dedication to excellence and innovation in this vital field.

**The Dr. Prabhakar Kore Basic Science Research Center (Dr. P.K. BSRC)** marked a significant milestone by organizing its First National Conference to commemorate the anniversary of the discovery of the structure of DNA. The conference, titled “Cracking the Code of Life – Molecular Biology in Action,” attracted a distinguished gathering of eminent scientists and over 150 delegates. The sessions covered critical themes such as the role of DNA research in general health, cancer biology, OMICS and therapeutics, infectious disease control, molecular diagnostics, and advanced technologies in DNA research. The conference showcased the growing impact of molecular biology on medical science.

In addition to the conference, the Center conducted a hands-on workshop sponsored by the Indian Council of Medical Research (ICMR) titled “Harnessing Nature’s Diversity: Integrating Phytochemicals, Cell Culture & Bioinformatics for Drug Discovery.” This workshop offered participants practical training in exploiting phytochemicals with the aid of bioinformatics and cell culture techniques for drug discovery and development.

The Center has undertaken eight research projects supported by KAHER seed funding and one project sponsored by ICMR. Currently, three full-time and five part-time Ph.D. students are registered with Dr. P.K. BSRC. Additionally, four doctoral students from other KAHER institutions are pursuing their research at the Centre.

In 2024, the Centre’s scientists achieved notable success, publishing 43 research and review articles in reputed journals. Furthermore, the Center secured two US patents (US Patent No. 11,884,677 B1 in January 2024 and US Patent No. 11,932,649 B1 in March 2024). These accomplishments underscore the Centre’s commitment to advancing scientific research and innovation in molecular biology.

#### **Health and Demographic Surveillance System (HDSS)**

KAHER’s Health and Demographic Surveillance System (HDSS) aims to create a dynamic framework that fosters health and demographic research, driving innovations in healthcare and influencing national health policies. The HDSS monitors a population of approximately 200,000 individuals, covering the PHCs and UHCs under JNMC, as well as the adopted villages under the NSS. This system provides a reliable source of timely and comprehensive data on births, deaths, causes of death, and illness within these communities. The data collected by HDSS is instrumental in evaluating and monitoring the impact of public health initiatives aimed at improving health quality. As a result, it serves as an essential resource for decision-makers and policy formulators in both the Government of Karnataka and the Government of India.

Currently, the center is leading the prestigious DST project titled “Feasibility and Impact of a Tribal Interactive Health Behavioural and Demography Surveillance System in Belagavi, Karnataka.” Additionally, two more significant projects have received funding approvals and are awaiting HMSC clearance. These projects are:

‘The Dynamics of Late Foetal and Neonatal Mortality in the Indian Context’ (NIH USA Funded)

‘Using Digital Solutions to Improve Causes of Death Data in India’ (UNSW Australia Funded)

These initiatives highlight the center’s ongoing commitment to advancing healthcare research and providing valuable insights to improve public health strategies in India.

The university also emphasizes holistic development by maintaining a Students’ Code of Conduct and a Staff Code of Conduct to uphold discipline and professionalism. The campus is equipped with a range of facilities, including a bank, pharmacy, gym, indoor stadium, internet access, café, department store, and travel booking services, ensuring a convenient and conducive environment for both students and staff.

Looking ahead, KAHER is fully equipped to tackle future challenges with unwavering commitment and dedication from its faculty. The university is poised to continuously raise the bar for teaching, learning, and research, ensuring its place as a global leader in health sciences education.

## 12. National Service Scheme (NSS) at KAHER

The NSS Cell of KAHER (KLE Deemed-to-be-University), established in April 2006, has now completed 18 years of service to the community. Initially starting with just 9 units, including one self-financed, the NSS strength has grown substantially. By 2019, the number of volunteers had risen to 1700, and as of the academic year 2023-24, this has expanded further to 3700 student volunteers across 37 NSS units. Over the years, NSS at KAHER has played a key role in fostering community engagement and social responsibility among students.

In recent years, NSS has organized several notable initiatives, including a state youth festival that saw the participation of 150 volunteers from across Karnataka. The NSS has also taken the initiative to promote awareness on body donation and organ donation, offering a certificate course to further these causes. From April 2023 to March 2024, the NSS organized **22 Special Annual Camps**, focusing on vital community issues such as the importance of clean water, waterborne disease prevention, sanitation, hygiene, and health check-ups for the public. A notable achievement was the rejuvenation of a 6-acre water pond in an adopted village, in collaboration with an NGO.

KAHER's NSS units have consistently organized various programs aimed at social and community welfare. These include campaigns such as **Swaccha Bharat Abhiyaan, Unnata Bharat Abhiyaan, Azadi Ka Amrit Mahotsav, Swacchata Pakhwada**, and others promoting voluntary blood donation, tree plantation, and health and hygiene awareness. These programs have benefitted between **6000 to 8000 people** annually. In addition, the NSS has conducted health check-up camps benefiting **52,000 villagers**, immunized **4300 children**, and collected and donated **982 units of blood**. The NSS also planted **1587 tree saplings** in the campus and surrounding adopted villages.

Throughout the year, NSS volunteers have actively participated in national and international events such as **National Integration Camps, Manali Adventure Camps, and Republic Day Celebrations**. They have engaged in street plays on social issues, yoga classes for school children, voter awareness campaigns, and life skills training for students and staff. In collaboration with NGOs and the Nehru Yuva Kendra (NYK), NSS volunteers have worked on diverse causes, including orphanages, environmental issues, and youth empowerment.

NSS at KAHER continues to empower students to become socially responsible citizens, actively contributing to the betterment of society through their involvement in various social, environmental, and health initiatives. The strong participation in programs such as **Har Ghar Tiranga, EYE Donation Awareness, and Voter Sensitization** underscores the commitment of KAHER's NSS to building a more socially conscious and responsible future generation.

## JNMC WOMEN'S AND CHILDREN'S HEALTH RESEARCH UNIT

The Women's and Children's Health Research Unit (WCHRU) of Jawaharlal Nehru Medical College of KLE Academy of Higher Education and Research (Deemed-to-be-University) (KAHER)'s has been conducting Community/Facility-based research aimed at reducing maternal and newborn mortality and morbidity since 2001. Over the past twenty-three years, JNMC's multi-disciplinary research team in collaboration with international multi-disciplinary team of clinicians, basic medical scientists, nutritionists, public health experts, information technology specialists, and other research staff with essential expertise and skills, including those trained for infant and early childhood growth and neurodevelopment assessment.

The WCHRU has participated in 52 research studies (with the majority being multi-country and multicentre), with 38 completed over the last 22 years and published more than 230 research publications out of these trials in collaboration with 51 universities and research institutions from the USA, UK, Canada, Zambia, South Africa, Australia, and various institutes across India with funding support of Rs. 175 crores from 17 sponsors including: WHO, NIH, BMGF, Thrasher Research Fund, UK-Medical Research Council, and Department of Biotechnology, Government of India.

The WCHRU has been funded by National Institute of Child Health and Human Development (NICHD) Global Network since the inception of the network in 2001. It has been refunded recently for the next seven-year cycle of the Global Network through 2030.

The WCHRU is designated as a "WHO Collaborating Center for Research in Maternal and Perinatal Health" for a period of four years w.e.f. September 16, 2019 and it is currently in the process of getting re-designated for a further period of four years till 2027.

The WCHRU always assures adequate staffing so that multiple studies can be carried out concurrently during the specified time frame, and trained research staff can be sustained and expanded as necessary. The unit's research priorities include: Postpartum Hemorrhage, Hypertensive Disorders of Pregnancy, Maternal Nutrition, Birth Asphyxia, Preterm Birth, Infant Neurodevelopment, Health System Strengthening and Community-based Maternal Newborn Health Registry. The results of these insightful research studies have had a profound impact at national and international levels in shaping public health policies.

The WCHRU has established strategic relationships with 20 Indian academic institutions from Karnataka, Maharashtra, Rajasthan, Uttar Pradesh, Chandigarh and Odisha to develop a collaborative network; which provides access to secondary and tertiary health facilities for implementation of research protocols.

The WCHRU has a well-equipped central office on the KAHER campus with facilities to securely archive study data, a pharmacy for storing and packaging clinical trial medications in a controlled environment, access to training facilities and audio-visual equipment, state-of-the-art network, computers, printers and sophisticated telecommunication capabilities that enable fast and dependable communication with collaborating partners. The WCHRU at Belagavi has a separate temperature-controlled room with power backup housing a 70 Mbps lease line with 128 direct IP setup, two mirror-configured REDCap servers, additional dedicated servers for data storage and transmission, electronic data capture, data hosting services, and a data archival room. Twenty-five auxiliary data centers established by the WCHRU and trained data management staff are available at all the other collaborating institutions of India.

## ADVANCED SIMULATION CENTRE AND CLINICAL SKILLS LAB

The KLE Advanced Simulation Centre and Clinical Skills Lab, inaugurated by Hon. Minister of Home Affairs, Shri Amit Shah, on January 17, 2021, is a cutting-edge training facility within KLE Academy of Higher Education and Research at J.N. Medical College, Belagavi. Designed to meet the evolving needs of medical education, this multi-professional center is equipped with state-of-the-art simulators and skills trainers to support a curriculum that emphasizes student-centered, patient-focused care.

With a mission to enhance patient safety, the Centre provides trainees with a realistic clinical setting including ICU, OT, and OPD setups—within its 9,000 sq. ft. space, facilitating hands-on, inter-professional training. Learners practice critical skills on advanced manikins and simulators, gaining practical experience in a safe, supervised environment that prioritizes innovation and high standards of care.

Led by a dedicated faculty from medicine, nursing, biomedical, IT, and allied sciences, and overseen by a steering committee under Dr. Prabhakar Kore, Chancellor of KLE Academy, the Centre embodies a commitment to excellence in healthcare education.

## SCHOOL OF MUSIC

The KAHER School of Music, led by Head of Department Pandit Rajaram Dattaram Ambardekar, offers a range of courses that cater to music enthusiasts and aspiring musicians. The institution provides structured learning across various levels and instruments, including a Certificate Course in Sugam Sangeet, courses in non-percussion (Harmonium) and percussion (Tabla), a Diploma in Hindustani Vocal Music, and a Bachelor of Fine Arts in Hindustani Classical Vocal Music. Young learners are offered Basic Courses in Vocal, Tabla, and Harmonium. Additionally, the school hosts a Membership Course focused on Karaoke, encouraging recreational engagement with music.

The teaching staff comprises accomplished musicians, including Dr. Sunita K. Patil and Dr. Durga Kamat-Nadkarni, both with doctoral degrees in music, along with Mrs. Sangeeta Bandekar, a part-time instructor specializing in Karaoke. Supporting the school's offerings are Shri Yadevendra Pujari, who serves as a Harmonium accompanist, and Shri Rahul Madolkar, the Tabla accompanist.

The student body spans a variety of disciplines within music, from certificate to diploma levels. Currently, the Certificate Course in Sugam Sangeet enrolls 13 students, while the non-percussion (Harmonium) certificate course includes 4 students. The Diploma in Hindustani Vocal Music draws 15 students, and the Membership Course in Karaoke has an additional 13 participants.

The establishment of the KAHER School of Music was driven by the vision of enriching campus life with the universal gift of music, a medium that transcends language and cultural barriers. This vision was notably inspired by the legendary Kirana Gharana vocalist, Padma Vibhushan Dr. Gangubai Hangal, who celebrated her 94th birthday on March 12, 2006, at KLE University. During her visit, she was honored with the "Swara Saraswati Abhinandan Parva" and expressed her concern that the appreciation for classical music was waning. She envisioned a dedicated Music Department at KLE University, and Dr. Prabhakar Kore, Chancellor of KLE University, promised to make her dream a reality, ensuring that the classical tradition would be fostered for generations to come. True to his word, Dr. Kore founded the School of Music within two years. The School was inaugurated on April 12, 2008, by Dr. Gangubai Hangal herself, alongside His Excellency Rupiah Banda, then Vice-President of the Republic of Zambia, marking a momentous occasion for the University and the music community.

The KAHER School of Music continues to nurture the legacy of classical music, bridging traditional and modern forms of musical education, and remains a hub for cultivating talent and appreciation.

Oral health education helps  
children learn about good oral  
hygiene habits such as regular  
brushing and avoiding sugary  
food and drinks.

Improved quality of life: Poor  
oral health can impact a child's  
quality of life by causing pain,  
discomfort, social embarrass-  
ment, and inability to eat there-  
by leading to malnutrition.

Cost savings: Prevention is often  
less expensive than treatment.  
Thus, early detection and  
prompt treatment will reduce  
cost of treatment.

## JAGADGURU GANGADHAR MAHASWAMIGALU MOORUSAVIRMATH MEDICAL COLLEGE, HUBBALLI

### Brief Write-up about the achievements of the Institution by the Principal:

KLE's Jagadguru Gangadhar Mahaswamigalu Moorusavirmath Medical College, Hubballi was established in 2021 when the first batch of 150 students of MBBS walked into the campus. It is affiliated to KAHER University which is accredited with NAAC A+. We are happy to share the good performance of the institute for which National Medical Council approved to admit 150 students in 2024.

It is now full fledged with four batches of MBBS (600 students) and faculty. In our college, the focus of teaching and learning strategies is on higher level of learning, critical thinking, problem solving, clinical decision making etc.

Our college stands proud with wonderful results of MBBS students in their First and Second Professional University Examination. With the motto of Go Green initiatives, E Pad examinations were introduced which reduced paper consumption to almost nil.

The University and Institute have been supporting the students and faculty to do research and publish in high impact journals. This is proved by various publications which were done in this year.

It is a matter of pride that few of the students presented their study in various conferences amongst whom a student received second prize at a state level conference. Medical Education Unit has conducted regular Faculty Development Programs like proficiency in clinical skill teaching, Manuscript writing in a step Towards capacity building of faculty. Skills lab has been instrumental in training the learners in a simulated environment. JGMMMC has been rigorously organizing free health camps to reach the community on a weekly/ fortnightly basis and serve the lower socioeconomic population. With the incessant support from Honourable Chancellor and Honourable Vice Chancellor, we will be shifting to our new campus at Gabbur Cross which would be a state of art multi-speciality and super-speciality hospital and Medical College.

1		"Value Added Course - GLAUCOMA"	26 <sup>th</sup> to 28 <sup>th</sup> June 2023.	<p>The department of ophthalmology KAHER, JNMC, Belagavi is conducting value added course on Glaucoma screening. The training will be conducted for M.B.B.S Students, Diploma ophthalmic technology students, B.Sc. Optometry Students. Glaucoma is not a single disease process but a group of disorders characterized by a progressive optic neuropathy resulting in a characteristic appearance of optic disc and a specific pattern of irreversible visual field defects that are associated frequently but not invariably with raised IOP. Glaucoma is sometimes called the "silent thief of sight" because it slowly damages the eyes and can cause irreparable harm before there is any vision loss. But this disease is stealthy in more ways than one. Glaucoma has been known at least since antiquity, and yet, researchers today still do not know what causes it in most cases. There are treatments to delay vision loss, but no cure, making it a leading cause of blindness all over the world. With early detection and treatment, it is possible to slow progression of the disease and preserve vision.</p> <p><b>Target Audience:</b> M.B.B.S Students, DOT students, B.Sc Optometry Students.</p> <p><b>Time Duration:</b> 15 hours</p> <p>What does this course teach?</p> <ol style="list-style-type: none"> <li>1) IOP measurement by Digital tonometry, Schiotz tonometry, NCT, Goldman applanation tonometry, I care tonometry.</li> <li>2) Optic nerve evaluation by Fundus photo, Direct Ophthalmoscope, OCT.</li> <li>3) Demonstration of visual field evaluation. The main aim of the course is to train the participants in the skills and knowledge needed to screen patients suffering from Glaucoma and to create glaucoma awareness among general public. **Value Added Course - Cerebral Visual Impairment (CVI): The Blind Brain!**

15<sup>th</sup> & 16<sup>th</sup>  
September  
2023

The Department of Ophthalmology KAHER, JNMC, Belagavi is conducting value added course on CEREBRAL VISUAL IMPAIRMENT (CVI). The training will be conducted for Post-Graduate students in the department of Ophthalmology & Pediatrics, DOT & **B.Sc Optometry Students.**

Preamble: Vision is fundamental to learning. Medical advances in neonatology have improved the survival rate of preterm infants, as well as children who are born under difficult neurological conditions. As a result, the prevalence of cerebral dysfunctions, whether minimal or more severe, is increasing in all developed as well as developing nations. Whereas in the past, ophthalmological diseases were considered principally responsible for severe visual impairment, today, all recent epidemiological studies show that the primary cause of blindness and severe visual impairment in children in developed countries is now neurological, with lesions acquired around the time of birth currently comprising the commonest contributor. The resulting cortical or cerebral visual impairments (CVIs) have long been ignored, or have been confused either with other ophthalmological disorders causing low vision, or with a range of learning disabilities.

Post-graduate students passing out with traditional teaching are not exposed to and are not aware of CVI mostly. This course enables them to be aware and mindful of this entity. Target Audience: Post-Graduates in the department of Ophthalmology & Pediatrics, DOT & B.Sc Optometry Students.

Time Duration: 16 hours

What does this course teach?

1) Vision evaluation in Paediatric patients.

## 2) Cerebral visual impairment and its evaluation

The main aim of the course is to train the participants in the skills and knowledge needed to diagnose children with CVI and enable them to create awareness regarding early diagnosis and habilitation. Participants will be awarded certificates, on successful completion of the course.
